

## CASE STUDY

### Vigilant Helps Pepper Construction Deploy RackWare's DR Solution on OCI

Family-owned for 90 years, Pepper Construction has remained at the forefront of commercial construction, leading the industry in sustainable, lean, and virtual construction technologies.

#### PROBLEM

1. Pepper Construction runs on CMiC - The ERP application for the construction industry.
2. Since CMiC is mission-critical, Pepper Construction decided to migrate it to OCI.
3. Pepper Construction could not afford downtime or execution flaws with the migration of their mission-critical application.

#### RESULT

1. Pepper Construction initially went with Robo Copy to take copies of on-prem instances to migrate to OCI.
2. Vigilant Technologies suggested RackWare as the superior solution and assisted with the implementation.
3. Pepper Construction immediately realized the value of RackWare and scaled the project from migrating 5 initial servers to 10.

*"RackWare automation has allowed Vigilant to speed up our DR delivery process ."*

**Santhosh Varatharajan**  
Sr. Manager, Vigilant Technologies

Vigilant, a global technology consulting and digital transformation company, has been delivering premium advisory, professional and managed services to enterprises looking for value, flexibility and excellent service.

RackWare provides an intelligent highly automated Hybrid Cloud Management Platform that extends across physical and virtual environments. It provides greater availability and flexibility for enterprise IT users, and reduced costs for enterprise IT providers. RackWare customers realize a cost savings of 40 to 50 percent, a reduction in time and resources by 20:1, while getting the highest performance and availability out of their cloud. RackWare is a well-established private company supporting customers from the Fortune 500 and large public agencies, around the globe.
